

**FP7 Information Day on ICT for Environmental
Management and Energy Efficiency**

21 May 2007, 9:30 am to 6:00 pm

Masaryk Conference Centre, Thákurova 1,160 41 Prague 6

This FP7 Information Day is organised by the Information Society and Media Directorate-General (DG INFSO) of the European Commission with the kind support of the Ministry of the Environment of the Czech Republic and the Technology Centre of the Academy of Sciences CG. The aim is to present funding opportunities under the Seventh Framework Programme for research and technological development (FP7) in the field of "Information and Communication Technologies for Environmental Management and Energy Efficiency" (Objective ICT-2007.6.3). Focus will be on research activities carried out by different research bodies in trans-national cooperation with the aim to gain or consolidate European leadership in the above key scientific and technology areas.

The Information Day is intended to help researchers that are interested in FP7 calls for proposals in the field of "Information and Communication Technologies for Environmental Management and Energy Efficiency" to understand the research topics for which proposals will be called for in 2007 (under FP7 priority ICT), to understand available research instruments and get guidelines on how to submit a proposal, as well as to meet other people having similar or complementary research interests in view of forming eventual proposal consortia. Following several FP7 PowerPoint presentations by representatives of the European Commission, participants will be given the possibility to make short PowerPoint presentations (max. 5 min) in view of networking.

A draft agenda and a registration web site for this event should become accessible from this Web site later in January 2007. For logistical reasons, registration will be mandatory, but there will be no registration fee; participants will have to pay their own travel, subsistence and accommodation costs.
