

SENSORS ANYWHERE

Joint ISESS and SANY Workshop

Call for Participation

Workshop-Organizers: Denis Havlik and Gerald Schimak,
Austrian Research Centers GmbH – ARC

The 2009 ISESS Conference (www.isess.org) is to be held in the Palazzo Cavalli Franchetti of the Istituto Veneto di Scienze, Lettere ed Arti, Venice, Italy, from October 6-9, 2009.

As part of this conference we ask you to participate to a special workshop during the event about *SENSORS ANYWHERE* by sending in abstracts or demonstration proposals until 2 March 2009. Contributions are invited for:

- Best Practices and/or Lessons learnt in Sensor Network Architectures as well as on Sensor Network Application development
- Research in the field of sensor network architecture (sensor networks, architectural models and approaches, sensing technology, e.g. architectural aspects of sensor networks, technology aspects, etc.).
- Applications based on scientific background but using real, innovative and forward looking technology to sense/monitor environmental issues. Themes around air, water, soil, etc in combination with risk, health, or management issues are highly appreciated.
- Demonstration of Applications, especially SANY Applications Demonstration in the area of risk management (geo-hazards, air, marine risks, etc.)
